

This course bundle builds worker capability to perform the tasks expected of them without risk to health and safety. Classes are scheduled to run in campus over five days.

- Identify health and safety legislative requirements of construction work including correctly selecting and fitting common personal protective equipment (PPE) used.
- Follow safety, compliance and risk management strategies when working at heights.
- Follow safety, compliance and risk management strategies when working in confined spaces.
- Provide advanced first aid response and life support in a range of situations, until the arrival of medical or other assistance.
- Minimise the likelihood and impact of injury when carrying out high-risk manual tasks—includes demonstrating and practising safe lifting techniques.

Course program

Making **Safety at Work** a priority is a no-brainer. Create a culture where staff know the potential health and safety risks of their work, the systems and control measures in place, how to work in a healthy and safe way, and how to respond to emergencies.
